JANUARY 1987

B & Meeting

NEXT MEETING: JANUARY 10, 1987 WOBURN, MA 8:00 P.M.

From Rotterdam to Rigby!

1st UNITARIAN CHURCH Happy New Year! The B&MRRHS kicks off the new year with a presentation by Mr. Rodney Cowen, entitled: "From Rotterdam to Rigby." Mr. Cowen's program will feature a potpourri of railroading along the Boston & Maine's Fitchburg and Portland Divisions during the 1960's and 1970's. This is an era that is often overlooked at our meeting presentations, and we are looking forward to this month's presentation by Mr. Cowen!

FEBRUARY 14, 1987

Old Timer's Nite!

Come out to the B&MRRHS February meeting and enjoy a discussion forum featuring Preston Johnson, Don Hills and Don "Robby" Robinson. Between them, Messers Johnson, Hills and Robinson have more than 120 years of Boston & Maine tradition, and will provide us with an exceptional evening! Questions and answers will follow. Members are encouraged to bring tape recorders or a shorthand whiz to maintain a permanent record for their own B&M Archives! Our last discussion forum was a great time, and this should prove just as good!

MARCH 14, 1987

New England Steam and Diesel Railroading!

The March meeting of the B&MRRHS will feature Mr. Norton D. "Skip" Clark, who will be showing us some of his great collection of New England steam and diesel railroading. Skip is a co-author of "150 Years of Commuter Rail in Boston", and a very accomplished rail photographer. This promises to be a most enjoyable show!

APRIL 16, 1987

Our Annual Meeting With the Mass Bay RRE!

The B&MRRHS will be traveling to Newton Highlands, MA, to join the Mass Bay Division of the Railroad Enthusiasts. Program will be announced at a later date. NOTE CHANGE OF MEETING DATE **AND LOCATION!!!**

COMING UP IN THE B&M BULLETIN...

From Ron Eames, our BULLETIN editor. comes the line-up for the next issue of the **BULLETIN:**

The feature article will be a piece of signalling systems on the Boston & Maine railroad: four pages of color showing various aspects and their meanings, by Vincent H. Bernard.

"The Great Caboose Caper!", a story of the fun and problems involved in restoring an old Boston & Maine buggy, by Peter

An informative account which answers the burning question, "Where has all the Freight Gone?", by Dwight Smith.

And a few odds and ends!

The entire XO interlocking has been placed o.o.s. The D&H - B&M diamond has been removed. The crossover on the D&H main (now B&M), is in place but is spiked with electric motors removed; and panel track is nearby. (This is as of November 14) All other switches are gone. A new connecting track joining the yard to the B&M main, closely paralleling the old line is now in place with hand

All signals governing the East End of the B&M yard and XO are gone. One has been converted from a home signal governing westward D&H movements across the diamond to a searchlight signal facing westward governing Eastward movements from the B&M yard into signaled territory on the D&H Albany line. The D&H Albany line now skirts the B&M yard. The D&H main is now B&M. The D&H yard is gone.

B&M trains are crossed at Noonans. West-

bound trains are held just east of the Hudson River Bridge for crew changes.

At Mechanicville west end there is track work in progress. There has been a reduction of leads into the yard. The D&H uses the outer lead as its Albany line. The two D&H (B&M) mains are in place as is the interlocking. All other yard leads have been cut, switches removed, and many "panels" taken away.

This sums up the activity. At present the East end of Mechanicville is a changed place. The overhead signal cables, old telegraph lines. and railroad telephone lines have been cut. The removal is near. All signal boxes and traces of the interlocking are in a pile as of November 14. All old rail is being loaded into gondolas. In the center of it all... The large "G" sign surrounded by levelled gravel, cut leads, and piles of old ties.

Fr. John S. Stasiowski

WHERE DOES ALL THE MONEY GO?

As we sit down to write this, it's in the middle of the Christmas buying season, and the above question has about a million answers. But, in this instance anyway, we are referring to where your dues' money goes. We hope that by showing you this, it will better help you understand what the B&MRRHS is up againstrand why we occasionally have to get up on our soapbox and yell.

ANNUAL BUDGETED EXPENDITURES

B&M Bulletin	\$38,000		
B&MRRHS Newsletter	\$4,500		
Malling	\$3,500		
Advertising	\$500		
Program	\$95		
Shows	\$50		
Billion all and a succession			

Miscellaneous:

Mailing \$150 Envelopes \$200 Other \$500

\$850

\$47,495

So, as you can clearly see, with 1400 members, the dues do not even cover our expenses. We need your help in getting our expenses down, while maintaining, our quality. Some things that you can do are:

Make sure that your address on your mailing labels is correct, and be sure to send in a change of address notice if you move. This includes people who relocate from New England during the winter months. A **good amount** of the \$3,500 in mailing is from getting mail returned, and then having to remail it, usually at a higher rate.

You can volunteer to work at a local train show. The B&MRRHS brings in an average of \$300 per show, and this will pay for a Newsletter or a mailing session. And, as an aside, when you work at a show, you usually don't have to pay admmission, unless you wish to make a donation, and can get a look around before the thundering herd gets there. Get a friend or two, and work one show in your area once a year. If we could get 15 people in the major Boston area, we would be set!

These are simple things, but they will help us out in the long run. Think about it!

Joe Shaw

... a column of opinion

NEW YEAR'S RESOLUTIONS

Happy New Year! The Directors, Officers and Committee Chairpeople of the Boston & Maine Railroad Historical Society wish to all members, their families and friends best wishes for a great 1987!

It seems every year about this time, we sit down with our conscience and make a "New Year's Resolution". This is a promise to ourselves and our loved ones that we will try to amend our "evil" ways so that life will be better all around during the coming year. Well, this year, the B&MRRHS has made sort of a resolution: 2000 in '87!

Basically, 2000 in '87 is this: The B&MRRHS has made a resolution to have 2000 members by December 1987. This will be our first major sustained membership drive ever, and can be beneficial to both the membership and the

B&MRRHS too! The flyer that was enclosed in this Newsletter outlines the main aspects of the drive, and also the benefits to the membership.

There are also other benefits that are invisible to most of the membership. First, we assume that you have read Chairman Joe Shaw's editorial which has preceded this column. If you haven't, please take a couple of minutes to do so now... even though it isn't railfanning, it concerns the survival of the organization that you loyally pay your dues to each June.

There. That wasn't so bad, was it? As you can see, it takes a large amount of money to keep the B&MRRHS operating year-round. Our membership has reached a plateau where our per-piece costs are very high. What this means in layman's terms is that, as most know, the more of something you order, be it **B&M BULLETINS**, B&MRRHS Newsletters, books, model railroad cars, or what-have-you, the lower the unit price becomes. If we can reach 2000 members, we will raise ourselves to a higher plateau, and reduce our per-unit cost to a much more acceptable level.

Another benefit of increased membership will be that there will be more operating capital (read more cash flow) for the B&MRRHS to work with. This may see the return of many of your former favorite projects, such as special run model railroad cars, commitments to print more books, more sales items from our Archives (those in the past have proved very popular), not to mention some new ventures. But, (and this is the bottom line...) it all depends on **YOU!**

There is an old saying that goes something to the effect that if you're not part of the solution, you're part of the problem. While this is not completely applicable here the B&-- MRRHS, certain parts of it do ring true. So now, we at the B&MRRHS Newsletter are going to make a resolution too. We hereby resolve that, after this editorial, we will not get up on our soapbox and complain, cajole, threaten, wheedle, beg, plead or in any way mention volunteering (or the lack thereof) until next January at the earliest. We find that it doesn't do much good anyway. But, in return, you've got to give a little ground too. For instance:

As Joe outlined above, train shows are an excellent source of income for the B&-MRRHS, and there are roughly 50 in the Boston area each season. At the present, we can cover only about 15 of these shows, strictly because of lack of manpower. At an approximate gross of \$300 per show, my basic math tells me that the B&MRRHS loses almost \$10,000 per year because the 10 or 15 people that normally do our shows cannot be four places at once. Your resolution: Work one show for the B&MRRHS each year. It would mean giving up one Saturday each year, with a couple of friends, talking trains, dealing with people interested in what the B&-MRRHS is doing, and having a good time. Golly, that leaves 51 Saturdays to use for whatever you want. If only 15 people will do this, we can double our income from

The subject of equipment preservation often comes up to us here at the Newsletter. Several times a year, we will get letters berating (pick one) the B&MRRHS, Railroad Museum Management, General Apathy, or The Powers That Be about the deplorable condition of (pick another one) The Flying Yankee, the 3713, the 1455, the 410, even the 3666 has come up (no Pun

intended) a couple of times with the dredging of Portsmouth harbor coming up in 1987. This is all well and good, calling our attention is important, but we have never received a letter that said "I think that it would be great to bring up and cosmetically restore the 3666 as a memorial. What can I do to help out?" Those last seven words are the most important things you could say. The B&MRRHS would like nothing better than to see these fine examples of B&M history restored to at least cosmetic, if not operable condition where practical, but at our present level of both cash income and volunteers, it just isn't practical to overextend ourselves at this time. Until this changes, the B&MRRHS will continue to provide technical, financial and physical help to those wishing to restore these historic items. Your resolution: As Howard Pincus so eloquently put it, (somewhat paraphrased), Help out physically, or technically, write a check to help fund the restoration. If you can't (or won't) write a check or help physically, or technically, give a word of encouragement to those involved. If you won't do any of the above, don't bother us.

We outlined earlier our 2000 in '87 campaign, and the prizes you can win. Your resolution: Give it a shot. Try and sign up a few friends. Talk to an old-timer that's always down by the railroad yard who seems to know everything about everything. Sign him up. Even if you don't win any of the prizes, you win by helping to create a stronger Society. Even an extra page in the Newsletter or more color in the BULLETIN will be the absolute worst that can come of it!

Finally, sometimes we go to railfanning spots and hear the B&MRRHS being trashed out by some people there. Sometimes it may be justified; true, we couldn't keep the 3713 in New England; true, we haven't been able to do much with the Flying Yankee, but it doesn't mean that we haven't tried. This hurts the people who work actively to keep the B&MRRHS going, and there's nothing like a good slap in the face to make your day of train watching perfectly miserable. Your resolution: Go easy on us. Instead of complaining that we haven't done something, try to help us do something. There is a very dedicated core of individuals that make this organization go, and they take their work very seriously. Think about it.

Well, there you have it. We'll keep our end of the bargain, and not write any more "we need

DENNIS ADAMS, EDITOR 28 SUMMER STREET EXETER, NH 03833

SCOTT WHITNEY, WEST END EDITOR 25 MAPLE STREET CLAREMONT, NH 03743

Opinions expressed in the signed columns of this Newsletter are the opinions of those authors of those columns, and do not necessarily represent the opinions of the Society, its Officers or members with respect to any particular subject discussed in those columns. The mention of commercial products in this Newsletter is for the convenience of the membership only, and in no way constitutes endorsement by the Society, or any of its officers or directors, nor will the Society be responsible for the performance of any of said commercial suppliers.

volunteers" columns for the rest of the year. But, you have to help us out in return. Now, we realize that there may be some that can't help as much as they'd like, either because of distance, physical condition, employment responsibilities or whatever. But, those of you who can, please do. We may have come down a bit hard in places, but there seems to be no other way to get the point across sometimes. Besides, you won't have to listen to us for another year. What comes next is completely up to YOU.

Dennis & Scott

CONSERVATION BOARD APPROVES PLAN TO REPAIR RAILROAD BRIDGE

The Newburyport Conservation Commission has approved a plan by the Massachusetts Bay Transportation Authority to spend \$1 million in repairs to the Route 1 railroad bridge across the Merrimack River

Commissioner Thomas N. Prendergast and abutters Francis and Jim Donahue of Donahue Motors asked MBTA officials if the bridge would be connected again to rail service and, if not, why the transit authority would spend so much money when there are no tracks that lead up to it.

MBTA official Larry McCluskey said the transit authority did not want to lose the right of way over the bridge and said it would be cheaper to repair it than tear it down. Besides, McCluskey added, there is talk of restoring rail service to Newburyport, and perhaps later to New Hampshire. From the Salisbury Point Railroad Historical Society Newsletter.

TO ALL ARCHIVES COMMITTEE MEMBERS AND FRIENDS:

Recent Developments have made it clear that I can no longer devote sufficient time to our B&MRRHS Archives to do the work justice. I have chaired this operation since 1978 - rather a long time to carry this responsibility, and I do think I need a rest. Accordingly, I have tendered my resignation to the society's Board of Directors, effective Nov. 20, 1986. The work at the Archives goes on, however, since Rick Conrad has agreed to take over this position. He has already served very capably as Chairman pro tem, and I expect that the Board will confirm his position at the next meeting.

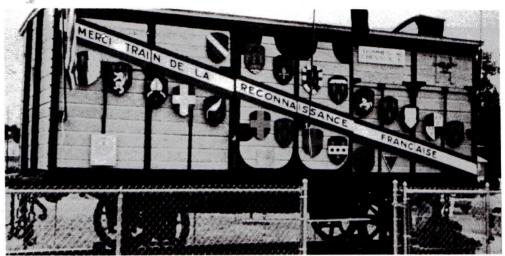

I shall miss, most of all, the pleasure of being supported as chairman by so many of you loyal Archives Committee members. Let's all give Rick the same support!

Forrest Mack

I think that we would be remiss here if we did not take a moment to thank Forrest for his work at the B&MRRHS Archives, and it would be safe to say that without Forrest's guidance there probably would not be a B&MRRHS Archives as we know it. Thanks for all your hard wark, Forrest!

Join the Mass Bay RRE and ride to the beautiful, snow-bedecked Green Mountain Republic of Vermont. Nothing compares to the splendor of New England in the winter. Just think - crisp, clear air, dark green firs and balsams sparkling with newly fallen snow, and jingle bells on a horse-drawn sleigh, the invigorating schuss of a skier flying down a fresh powder slope - all this can be yours for one day only when you join the happy throng of railfans, snow bunnies, and hearty outdoorspeople on Saturday morning, February 21st, 1987, aboard the **NEW ENGLAND STATES LIMITED**.

Address correspondence to Massachusetts Bay Railroad Enthusiasts, Inc., Box 525, Bedford, MA 01730.

Frank O'Malley writes in "in reference to the inquiry about the 40 & 8 cars, a friend of mine that I work with is a member of the 40 & 8, and he supplied the following information:

The Vermont "Merci" boxcar is on display and restored at St. Albans, VT, at the Post #1 American Legion.

New Hampshire's is displayed in a new building in Manchester under the care of Grande du 40 & 8.

New York's is located at Whitesboro, NY c/o Voiture 92 - 40 & 8 and is being restored. The photo above is of the Vermont car at St. Albans.

We have a complete roster of Guilford Transportation Industries locomotives as of November 20, 1986 courtesy of **Don LeJeune**:
